BMM-JOB-NIB

Dear Dr. Grey-Wilson,

Thanks for your kind letter of last 31 July with the identifications of my Impatiens slides. I am most grateful for your help. I hope, that your trip to Nepal was a success. Are you still working on African balsams? I go next week again to Tanzania for one month and try to collect Impatiens seeds for our Botanic Garden and of course, also for you if you like to have some of them.

The slides arrived back in the best order.

With the kindest wishes

Yours sincerely

MCN

Dr. T. Pócs
